DETAILED ACTION

Response to Arguments

Applicant's arguments filed July 11, 2005 have been fully considered but they are not persuasive.

Applicant argued that Grondahl (5,936,464) fails to disclose the claimed invention (see applicant's Remarks). However, the Examiner disagrees.

Grondahl (Fig. 1) discloses a power divider (210) for dividing a signal into amplitude (see col. 3, lines 64-67) and phase (see col. 2, lines 53-67) paths; an A/D converter (257) is functional equivalent as claimed "amplitude mapping circuit" since A/D converter (257) also receives amplitude signal via elements (220, 270), which then converts the amplitude signal to digital word (binary control word), see col. 3, lines 35-58; wherein digital word quantized into bits and binary value, accordingly; and a variable gain amplifier (252) including a plurality of transistors (610, 620, 630, 640) which can be read as plurality of amplifiers, see Fig. 6, coupled to the amplitude mapping circuit (257), wherein the binary value is transmitted to at least one of the plurality of amplifiers to specify a gain level of the amplifier via its gate.

Accordingly, claims 1-8 remains rejected, see PRIOR Office Action Rejection mailed May 19, 2005.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
